(54) SPRING REPLACEMENT TYPE MATTRESS

(57)Abstract:

PROBLEM TO BE SOLVED: To enable the replacement of springs in such a manner that the comfortable sleeping posture and comfortability to sleep may be obtd. so as to meet the body weight and bodily shape of a person who lies thereon are obtd.

SOLUTION: This mattress has plural pieces of pocket spring assemblies 2, 2',... of the same size as the size of a rectangular cushion frame 1 and a freely openable and closable armoring body 3 and has plural kinds of the pocket spring assemblies 2, 2' varying in elastic characteristics. The pocket spring assemblies 2, 2' varying in the elastic characteristics are selected and are housed into the rectangular cushion frame 1 and the entire part is covered with the freely openable and closable armoring body 3.
